

We were so excited about the performance of our new Spectrum™ commercial upright vacuum, we let customers try it early. Here's what they had to say:

“...the best commercial vacuum cleaner I have ever used.”

“The filtration is better than every other vacuum we’ve used—the dust and dirt it picks up stays captured. And with the improved brush design and continuous vacuum airflow, we’re seeing much cleaner carpets. The CRI Seal of Approval is important, too—it confirms the performance we’re seeing!”

Ray Godin

Custodial Manager
Eastern Washington University
Cheney, WA

“Our staff was impressed—not only did the vacuums get the job done, but they provided durability and ease-of-maintenance normally associated with much more expensive machines. The on-board tools and simplicity in bag changing were a big plus. We will be transitioning to the Advance Spectrum vacuums at every property we operate.”

Malcolm C. Fogleman

Director of Operations, Hospitality Staff
600-room resort property
Lake Buena Vista, Florida

“I am pleased to report that these vacuums have performed better than any vacuum we have ever sold and have not had one complaint. The user feedback has been very positive. The most common question has been, when can we buy more of the units?”
