LASTING VALUE

MORE PRODUCTIVE
CLEANING PRACTICES
FOR HEALTHIER FACILITIES

Enhance cleanliness, minimize HAIs, improve staff productivity.

To assure the health, comfort and contentment of patients and staff, you have a challenging and ongoing requirement to reduce healthcare-associated infections and achieve the highest level of floor surface cleanliness in your facility. You also need to control ever-increasing labor costs while maintaining your reputation for healthcare excellence. Advance can help you improve the cleanliness of your care facilities to maintain a more sanitary environment while actually reducing the amount of labor and resources required.

Create a cleaner, more satisfying healthcare environment.

Improve patient experience, with increased safety and less labor.

Innovative cleaning solutions from Advance will improve patient satisfaction and meet your objectives for cleaning performance, to protect the health environment of your facilities and reduce staff requirements, consumables and overall maintenance costs. Choose from a full line of automatic scrubbers, floor machines, burnishers, vacuums and carpet extractors that are more effective and more efficient. Floors are made cleaner and safer, using fewer chemicals and detergents, while improving indoor air quality for patients, staff and visitors.

Contribute to a healthier environment.

Advance cleaning technologies can help you create a healthier environment within your facility, and a healthier external environment as well. Our innovative products result in fewer chemical fumes, superior air quality and a quieter facility. For example, Advance Spectrum™ vacuum cleaners employ multiple levels of filtration, including true H.E.P.A. filters designed to capture up to 99.97% of dust particulates down to 0.3 microns. Advance scrubbers minimize the use of harsh chemicals and can remove floor finish with water only. Advance vacuums and burnishers allow daytime cleaning, operating quietly with a sound level of less than 70 dB A. And battery powered machines are even quieter. Advance carpet extractors and vacuums are certified by the Carpet and Rug Institute for superior performance.

The versatile **Advance ES4000™** lets you achieve total carpet care, from effective dry sweeping to daily touch-ups and low-moisture interim cleaning to heavy-duty extraction for restoration, all from one machine.

The **Advance BU800™** battery powered burnishers deliver consistent and even polishing for superior wet-shine results, and the industry's best passive dust control for improved air quality.

« On the cover: The **SC500™ REV™** features a 20 inch scrub path and revolutionary random orbital scrubbing technology, to remove floor finish with water only, offering up to 90% labor savings and up to a 70% reduction in water and chemicals versus conventional stripping.

PORTFOLIO OF OVER 125 CLEANING SOLUTIONS

VACUUMS

EXTRACTORS

The **Advenger®** Rider Scrubber lets you scrub larger areas with greater productivity and less operator fatigue. The Advenger is available with our exclusive EcoFlex™ System that cleans with water only or just the correct amount of detergent, allowing you to reduce chemical costs and environmental impact.

The new, compact **Advenger SC351™** battery-powered scrubber features a low profile to scrub hard-to-access locations. Superior maneuverability allows you to clean in all directions with water contained under the deck to deliver a clean, dry surface.

The revolutionary REV.™ Remove floor finish with water only.

Now there's a superior daily scrubber that can also totally eliminate the need for chemical floor stripping. REV random orbital scrubbing technology can remove multiple coats of floor finish in a single pass to strip up to 90% of the labor out of conventional floor stripping—and reduce water and chemical consumption 50-70%. Here's what our customers have to say:

"Our strip and recoat crews used to consist of four people; with orbital scrubbers, we were able to reduce it to one person and reassign the other people to do other work that would not have been completed."

"In the past, it required two days to prep the floor and another day to coat the floor. With orbital scrubbing technology, we were able to complete the prep work in five hours and coat the same day—that's a 67% reduction in time."

"We really like orbital scrubbing for the enhanced worker safety benefits; we have experienced a number of slip and fall incidents due to stripping chemicals over the years; orbital scrubbing removes a great deal of these risks for us."

Advance Advantages for Healthcare.

- Reduce HAIs, enhance sanitary conditions and overall facility health
- Save labor: scrub floors clean and dry in one pass or remove floor finish without chemicals
- Noise minimized allowing daytime cleaning
- Improve indoor air quality: superior vacuum filtration and scrub with less chemicals for reduction of fumes and odors
- Increase safety and reduce risk by minimizing chemical fumes, slippery floors and slip-and-fall accidents
- Healthier overall environment for improved patient satisfaction and reputation of facility
