

REV™ TECHNOLOGY:

A Revolution in Daily Cleaning

REV Technology is the Preferred Choice for Routine Daily Cleaning with Superior Results

- **Floors are Cleaner in a Single Pass** – Dual random orbital action quickly and efficiently attacks dirt from multiple directions.
- **Save Time with Fewer Dump and Refill Cycles** – REV™ machines use far less water than conventional disc scrubbers.
- **Save Money!** – Less water means less detergent is used.
- **NO SIDE SPLASH** – The slow, macro orbit of REV prevents water from splashing onto adjacent surfaces.
- **NO SPLASH SKIRT** – Cleans tight to walls, which reduces time spent on detail work.
- **Most Even Cleaning in the Industry** – REV's exclusive fixed pad driver allows the entire pad surface to clean your floor.
- **No Swirl Marks** – Dual random orbital action delivers an even clean without swirl marks!
- **EcoFlex™ Onboard Detergent Metering System** – Saving money, time, and the environment.
