

# Adgility™

## Back Pack Vacuum

New from Advance is the Adgility™ back pack vacuum. With its light weight, small size, and ergonomic shape, the Advance Adgility maximizes operator agility and cleaning ability to create a new standard in comfort and performance.

At 6.4 pounds, the Adgility vacuum can be worn for extended periods of time without causing fatigue or muscle tension. Its small size and low weight allows the user to be more productive in tight areas such as cubical farms and commercial office space. Don't let its small size fool you; the Adgility vacuum has the most power, 25% more, than any machine in its class, which means better pick-up for increased productivity and deeper cleaning. Although the Adgility vacuum uses a powerful 1,000 watt motor, the unit is quiet enough for daytime cleaning without disturbing building occupants.

The Adgility vacuum features three levels of filtration and an optional H.E.P.A. filter for improved indoor air quality. The machine includes a 12 inch combination floor tool to provide dual surface cleaning for both hard and soft floors. In addition, the rotating dust brush enables the bristles to be turned to the correct angle, ensuring maximum cleaning.

The Adgility back pack vacuum was built with operator comfort in mind with its padded waist belt. The belt includes loops to hold the crevice tool and dust brush, keeping them handy when on the go. No shoulder straps make it easier for the operator to bend over to pick up trash, larger debris, and perform other tasks while vacuuming. The machine's bent wand is ergonomically designed for users of all hand sizes and is less fatiguing to use. The Adgility vacuum's patented, curved back conforms to the user's body and provides greater comfort than competing designs. This vacuum is built to fit most people's body types.

### Standard Features Include

- 50 foot yellow safety power cord
- 12 inch combination floor tool
- Chrome plated steel telescopic tube
- Ergonomic bent wand
- Rotating round dust brush
- Crevice tool
- Padded waist belt
- Built-in elastic accessory loops on belt
- 3-level filtration – dust bag, motor pre-filter, exhaust filter

### Typical Applications Include

- Obstacle Filled Environments
