

**Reduce  
your cost  
to clean**  
with our innovative  
solutions.

**Whatever your cleaning challenge,  
there's an Advance floor care product  
to match.**

We've designed our products to meet the everyday cleaning needs of retail environments of every size. From large rider scrubbers that handle big box and warehouse cleaning with ease to mid-size walk-behind and small micro-scrubbers that are easy to transport to different locations. You can rely on Advance to deliver the clean your customers have come to expect, every day.

**Smart cleaning.**

# The right tools for all your needs.

## SC100™

The Advantech SC100 is an upright micro-scrubber designed for cleaning narrow areas and getting the job done faster.

- Scrub and dry in a single pass, replacing the mop and bucket
- Robust aluminum frame design guarantees high reliability and long life
- Easy to carry and transport from one location to another

## SC2000™

The SC2000 rider scrubber is compact and easy to maneuver in small spaces. SilenTech™ quiet technology enables quiet daytime cleaning in noise sensitive areas.

- 20 inch cleaning path
- Compact for easy maneuverability
- Smart Flow solution flow technology, automatically controlled by machine speed

## SC500™

This 20 inch walk-behind scrubber is designed to increase productivity and drive down your overall cost to clean.

- Ideal for daytime cleaning
- Smart Flow™ solution flow technology, automatically controlled by machine speed
- Available in disc or REV™ random orbital scrub system

## VP600™

The VP600's modular design lets you choose exactly what you need, and makes the vacuum cleaner easy to maintain and service.

- Best in class sound quality
- Power boost function for optimized cleaning performance
- Highly maneuverable with fully directional caster wheels

# Reduce your total cost of ownership with our innovative solutions.

The Advance floor care portfolio has been designed with your everyday cleaning challenges and costs in mind. We went straight to the source of some of the most common expenses and created smart solutions that reduce consumption and noise levels, keeping the machines easy to use. Advance cleaning equipment is perfect for optimizing your time, budget, and labor resources so you can drive down your cost to clean.

## **Silence is golden**

SilenTech™ patented technology reduces sound levels and increases productivity by allowing you to clean during daytime hours.

## **Every second counts**

With EcoFlex™, operators can easily engage a burst of extra cleaning power while cleaning.

## **Every drop matters**

Smart Flow™ technology automatically reduces solution flow based on machine speed.
