

QuickStar™

Canister Vacuum

Advance

FACT SHEET

The new canister vacuum from Advance makes it possible to clean places unreachable by bulkier vacuums. The QuickStar™ canister vacuum is a multi-surface, multi-purpose vacuum that cleans carpet and hard floors as well as other horizontal and vertical surfaces. The QuickStar vacuum is ideal for cleaning around congested cubicle spaces and throughout any commercial office space. A low center of gravity and three-point stance make it easy to maneuver for any operator. Quiet operation makes it possible to clean during daytime or business hours without disturbing the facility's occupants.

The QuickStar canister vacuum maximizes operator productivity. Equipped with a 1,100 Watt motor, this vacuum is powerful enough for even the most demanding of cleaning tasks. Weighing in at less than 14 pounds, the QuickStar canister vacuum can be used for extended periods of time without causing operator fatigue. A dry-basket filter comes standard on this vacuum, allowing it to be used as a bag less machine. This feature further extends operator productivity and lowers the total cost of ownership.

The QuickStar canister features three levels of filtration to clean the air before it is passed through the motor and expelled into the environment. This design protects the operator, motor and the building's occupants from excessive dust circulation. By using a sealed canister vacuum you eliminate unfiltered air leaks into the environment. This canister vacuum uses a large, 2.6 gallon (10 liter) dust bag resulting in fewer bag changes and higher productivity.

The canister design means less clogging and fewer moving parts that require replacement, for a lower total cost of ownership. The machine's 33 foot cable boosts productivity by providing a longer cleaning reach. In addition, the machine includes built-in cord storage on the top of the machine and wand storage on the back of the machine. These storage features make it more convenient to store in crowded cleaning closets. The machine includes a 12 inch combination floor tool to provide dual surface cleaning for both hard and soft floors.

STANDARD ACCESSORIES INCLUDE

- Dry Basket Filter for Bag less Operation
- 12 Inch Multi Purpose – Multi-Surface Floor Tool
- Rotating Dust Brush
- Soft Crevice Tool
- Six Dust Bags

TYPICAL APPLICATIONS INCLUDE

- Hospitals / Healthcare Facilities
- Commercial Cleaning
- Education Facilities
- Government Buildings and Installations
- Retail
- Health Clubs
- Daytime Cleaning
- Airports / Train Stations / Bus Depots

Advance QuickStar™ Canister Vacuum

All tools mount on tube or wand for versatile cleaning

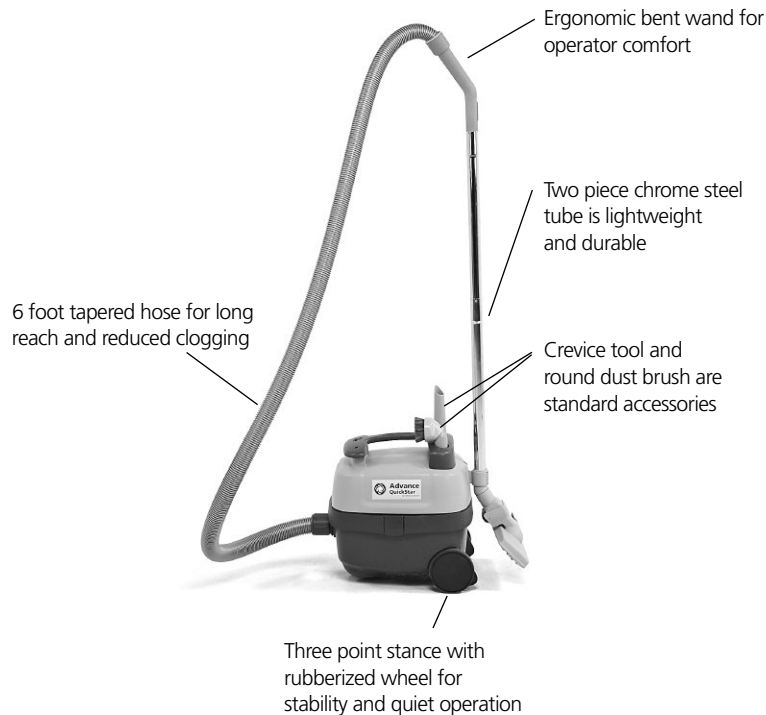

Easy transport with center handle and lightweight design

Superior edge cleaning and detail work with our top of the line crevice tool

Onboard tool and cord storage

Defining Cleaning Innovation...

- Our products are designed using innovative technology that increases productivity and drives down the cost to clean.
- You can get expert service and maintenance for your Advance machines from factory-trained personnel around the world. Fast parts delivery, too.
- Maintain peak performance with Nilfisk Genuine OEM Parts.
