

Adphibian™

Multi-Surface Extractor-Scrubber

Advance

FACT SHEET

Advance's Adphibian™ soft and hard floor machine is designed to answer the multiple cleaning demands you face today. Demands like getting maximum efficiency and flexibility from your operators and your equipment. The Adphibian enables cleaning staff to use one machine to pre-spray, and extract carpets and also scrub hard floors.

Operators are able to switch between pre-spraying and extracting at the push of a button. A 30 second tools-free changeover lets operators switch between using a full-functioning carpet extractor and a full-functioning cylindrical scrubber with patent-pending technology. Even the special anti-microbial brushes are designed to work on all surface types. The patented AXP™ Onboard Detergent Dispensing System lets the operator choose the perfect cleaning solution for all floor surfaces. And the machine's ease-of-use means fast training and consistent cleaning performance by all of your operators.

The Adphibian multi-surface machine is the first of its kind to be awarded the CRI Seal of Approval for low-moisture and deep-cleaning extraction. Adphibian features our patented dual-cleaning mode that lets operators choose between LIFT™ Low-moisture mode and Restoration mode. For daily carpet cleaning, Advance's patented LIFT™ technology (Low-moisture, Indirect spray, Fast dry time, True cleaning) uses a unique indirect spray that leaves carpets clean and dry in less than 30 minutes. For heavily soiled areas, nothing beats Adphibian's deep-extraction performance. Adphibian's unique Deep Treat™ pre-spray mode allows you to quickly deep-treat heavily soiled areas by automatically applying and agitating any pre-spray detergent or encapsulate on your carpeted surfaces. A simple push of a button then allows the same area to be extracted with clean water.

Environmental friendliness and safety are also critical requirements for the cleaning equipment you use today. With Advance's Smart Solutions AXP™ Automatic Detergent Dispensing System, Adphibian helps you minimize water and detergent use, while also allowing you to use any detergent – including those that are green certified.

Optional maintenance-free AGM batteries eliminate the safety concerns associated with maintaining traditional wet-acid batteries. Rubber bumpers and non-marking tires protect facilities and meet LEED-EB guidelines for cleaning equipment. The unique squeegee provides 100% water pick-up on turns, reducing the risks associated with slip and fall injuries, while the easy-to-use control paddle is ergonomically designed for comfort and handling. Low sound levels for both extraction (69 dB A) and scrubbing (66 dB A) makes the Advance Adphibian comfortable for operators and building occupants, and ideal for daytime cleaning.
