

# AdSpray™ 1000XPC

Pressure Washer

## FACT SHEET

### STANDARD ACCESSORIES INCLUDE

- Hose
- Wand
- Heavy-duty ground-fault circuit breaker protection
- Inlet water filter protection for pump
- High/low down-stream chemical injection

The AdSpray™ 1000XPC pressure washer blasts away dirt and grime for fast and efficient cleaning. Fast because it power cleans... efficient because the chemical reaches areas you can't. The chemical is sprayed on with low pressure, then dirt is blasted off with high-pressure power.

The AdSpray 1000XPC is a cart-mounted model with adjustable pressure to 1,000 psi (69 bar) for various applications.

The spray gun has trigger on/off spray control, and is at the end of a 40 foot (12 m) long hose. Nozzle tip turns to vary the spray pattern from zero to sixty degrees. A high/low pressure nozzle control switches between low pressure chemical application (to save on costly chemicals) and high pressure rinse.

The AdSpray 1000XPC with its 1.5 horsepower, 115 volt motor provides ample power to a 2.2 gpm (8.3 L/min) pump. An inlet water filter traps contaminants to protect pump from premature wear, and chemicals are injected at variable rates, "after the pump" for additional protection. This machine handles water up to 140° F (60° C). Ceramic plunger, forged crankshaft, stainless steel valves and other features assure durable pump performance. In fact, the pump has a five-year warranty.

The AdSpray has a 1.5 hp, 115 volt motor which provides ample power to a 2.2 gpm (8.3 L/min) pump. An electrical thermal valve with on/off indicator light, protects the pump by shutting the unit off if it is left on by mistake. The pump can handle water up to 180° F (82° C), and has a one-year warranty.

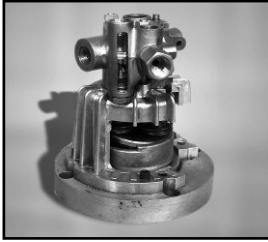

Cord and hose storage is built into the roto-molded high-density polypropylene handle. This unique handle/frame design is also a six gallon (22 L) cleaning solution tank.

The AdSpray 1000XPC offers cleaning power, portability and economy, with a variety of accessories to meet your cleaning needs.

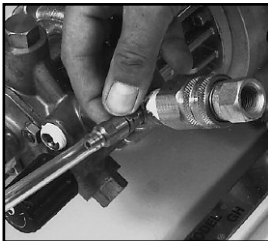

# Advance AdSpray™ 1000XPC

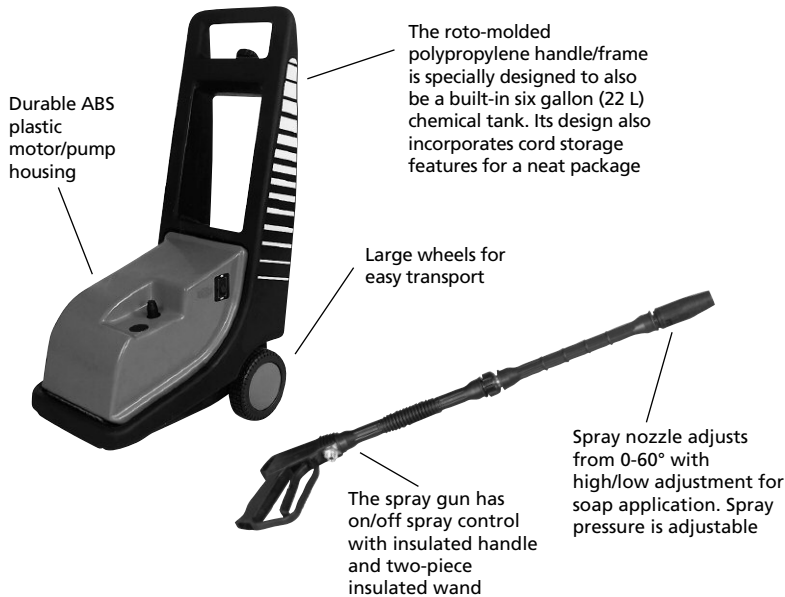

Pressure Washer

The AdSpray™ 1000XPC has a rugged pump with ceramic pistons and an aluminum cylinder head which helps to maintain high performance. The mechanical thermal valve protects the pump if the wand is left on in error. Pump has a five-year warranty.

Chemicals are injected after the pump, so they can't cause problems to valves or seals. Ratios are set and locked in with controls by the operator. Chemical metering saves cost by reducing waste.

## 1000XPC Pump Has 5-Year Warranty

### Defining Cleaning Innovation...

- Our products are designed using innovative technology that increases productivity and drives down the cost to clean.
- You can get expert service and maintenance for your Advance machines from factory-trained personnel around the world. Fast parts delivery, too.
- Maintain peak performance with Nilfisk Genuine OEM Parts.

Nilfisk Genuine OEM Parts

## Technical Specifications

<b>Motor/Engine</b>	1.5 horsepower, 115 V / 15 amp / 60 Hz
<b>Power Cord</b>	35 ft (10 m) long, with ground fault interrupter
<b>Pump</b>	Teflon graphite seals, ceramic coated steel pistons, stainless steel valves, ceramic plunger, and by-pass running against closed gun. Pump is built to handle 140° F (60° C) water temperatures, and has a 5 year warranty.
<b>Output</b>	Adjustable to 1,000 psi (69 bar) at - 2.2 gpm (8.3 L/min)
<b>Chemical Injection</b>	Variable rate, after the pump
<b>Hose</b>	40 ft (12 m), non-marking, high-pressure
<b>Gun</b>	Two-piece 36 in (91 cm) with 0-60° adjustable spray nozzle with high/low pressure switch, trigger on/off spray control and plastic insulation
<b>Construction</b>	ABS plastic motor/pump housing, frame and handle of high-density rotational molded polyethylene.
<b>Dimensions</b>	
Height	45 in (114 cm)
Width	15 in (38 cm)
Length	25 in (64 cm)
<b>Weight</b>	Net 105 lb (48 kg) / Shipping 110 lb (50 kg)
<b>Part Number</b>	56100113
