

AWD-320 & AWD-315

Wet/Dry Vacuum

FACT SHEET

The Advance AWD series of commercial wet dry vacuums incorporate the technical excellence and attention to detail that have made Advance the brand of choice among cleaning professionals.

Advance AWD vacuums come in two sizes, 20 gallons and 15 gallons with identical foot prints. The blow molded tanks have a rear mounted drain hose that makes emptying the contents simple and clean. A 10 foot hose connects to the vacuum and utilizes our field proven locking vacuum interface. The adjustable handle easily accommodates users of different heights and can be folded down over the top of the machine for easy transport.

A 50 foot safety yellow power cord provides the power to the 1,350 watt 2-stage motor. The water resistant switch is covered with a rubber boot and is rated for 20,000 on/off cycles.

Versatile dry filtration options are abundant on the AWD vacuums. Up to four levels of pre-fan filtration can be added to the machine. A basket filter comes standard and can be used along with the optional dust bag, and H.E.P.A. filter.

Liquid recovery is accomplished with either the two piece light weight aluminum wand and 14 inch squeegee tool or with the optional front mount squeegee assembly. The 24 or 30 inch front mount squeegee is the high productivity solution to recovering large amounts of liquids during emergencies or when stripping and refinishing floors.

TYPICAL APPLICATIONS INCLUDE

- Education
- Government
- Hospitality
- Building Service Contractors
- Malls and Retail
- Healthcare

STANDARD FEATURES INCLUDE

- 50 foot safety yellow power cord
- Dry filter basket
- Adjustable handle
- 10 foot crush proof hose
- Squeegee and hard floor tool
- Rear drain hose

OPTIONAL ACCESSORIES
