

Sprite® Air Scoop™

Wet/Dry Tank Vacuum

Smart cleaning.

A Nilfisk-Advance Brand

Sprite® Air Scoop™

Wet/Dry Tank Vacuum

The Advance Sprite® Air Scoop™ Wet/Dry Tank Vacuum is Truly a Versatile Product for Many Time and Labor Saving Jobs.

With today's high cost of labor, why waste time with mops and buckets? Put an Advance Sprite® Air Scoop™ on the job and start saving money.

The Advance Sprite Air Scoop comes with a 16 gallon (60 L) tank that is rugged, rotationally molded polyethylene which is corrosion proof and will not chip or dent.

It conveniently pivots on a hinge to dump its contents or drains through a built in hose. The entire tank lifts off for cleaning and allows total access for motor service or maintenance.

The powerful, yet quiet, 70 dB A, 1.3 hp 2 stage, by-pass motor is located under the tank for protection from water and debris. A float system stops recovery to prevent tank overflow.

For dry pick up, insert a sock filter or a reusable cloth bag, and use any of the dry pick up accessories. A washable exhaust filter helps assure dust containment.

Ideal applications include:

- Hospitals/Healthcare Facilities
- Schools and Universities
- Government Buildings and Installations
- Supermarkets
- Shopping Malls
- Warehouses
- Distribution Centers
- Retail Stores
- Airports

The Advance Sprite Air Scoop picks up water faster than those with a hose and wand, and is especially effective in tight spots too. The 24 inch (60 cm) front-mounted squeegee maneuvers right up to walls and into corners, picking up either in forward or reverse. A simple floor pedal raises or lowers the squeegee, which is spring loaded to follow floor contours for thorough results.

Roto-molded poly tank is hinged for tip and pour emptying. The tank can be completely removed from the base for easy clean-out.

Positioned at the lowest point in the tank, the drain hose provides an alternative draining method.

Simple design gives direct access to modular vac motor. Four bolts and motor is released for service or replacement.

The front mounted squeegee on the Sprite® Air Scoop™ can increase productivity by 80% over manual pick up tools.

The base has an easy to use, rugged on/off switch. The Sprite® Air Scoop™ also has a pedal for operating the front mounted squeegee.

FEATURES AND BENEFITS

Save time and labor with the Air Scoop™ front mounted squeegee.

Rugged construction with durable components assures years of reliable performance.

Easy access motor can be released by removing four bolts.

Low sound level permits operation anywhere, anytime.
