

ET610™

Portable Extractors

Advance

FACT SHEET

*shown with optional
upgrade AquaWand™*

ET610™ portable extractors are the culmination of a major engineering and design initiative of Advance that emanated from direct field input of cleaning technicians who used high performance portable extraction machines every day. The ET610 represents a dramatic step forward in implementing unique, productivity enhancing features that considered even the minutest detail. These features go a step beyond traditional componentry that is common to most extractors – pumps and vacuum motors – and take into account the most common annoyances expressed by cleaning technicians. For example, moving the solution tank filling site to a location where the inevitable spill does not come in contact with any electrical components or switches. The ET610 has a 3-stage vacuum motor for unrestricted airflow and superior water recovery. The closed, sealed system reduces wear and extends vacuum motor life. A pressure gauge, pressure regulator allows you to dial in specific pressure for sensitive texture, hard and textile surfaces. Extension cord wraps protect cords and make maneuverability and transport through facilities easier. No detail was overlooked.

PERFORMANCE KEY FEATURES INCLUDE

- Ergonomic design allows for easier loading and transport.
- Unique transport handle design makes maneuverability, and control around facilities a breeze.
- Handle on top of the tank assists in lifting, loading/unloading and acts as a vacuum hose guidance system.
- Recovery tank design – sloped tank design to disposal hose makes for more complete emptying of recovery tank and the recessed channel for ball float reduces turbulence.
- Easy-fill solution tank access port is designed to make it easier to fill from bucket at average lift height. Located away from electronic switch and controls reduces maintenance issues.
- Low moisture / environmental footprint reduction system – Less water combined with higher heat means faster drying, less chance of soil wicking from pad or shrinkage. High heat system reduces chemical usage in cleaning and reduces the need for chemical sanitizing of surfaces.
- Wand caddy is molded right into the extractor, allowing for easier mobility and transport.
- Recessed electronic switch plate protects switches from solution tank and reduces water exposure.

TYPICAL APPLICATIONS INCLUDE

- Government Buildings and Installations
- Contract Cleaners
- Office Buildings
- Hospitality Facilities

Advance ET610™

Portable Extractors

Defining Cleaning Innovation...

- Our products are designed using innovative technology that increases productivity and drives down the cost to clean.
- You can get expert service and maintenance for your Advance machines from factory-trained personnel around the world. Fast parts delivery, too.
- Maintain peak performance with Nilfisk Parts.

Recessed electronic switch plate protects switches from solution tank and reduces water exposure.

Two front panel roller wheels assist in loading and unloading from a transport vehicle.

Molded wand caddy for easy transport.

Easy clam shell access for maintenance.

The ET610™ comes standard with a 12 inch stainless steel wand. The AquaWand™ is an optional upgrade.

- 1 12.5 gallon solution tank
- 2 11 gallon recovery tank
- 3 Two handles for easy maneuverability
- 4 Handle on tank to assist loading/unloading and to guide vacuum hose
- 5 Oversized, rubber grip rear wheels
- 6 Easy-fill solution tank access port

Technical Specifications

Models	ET610™ 100C	ET610™ 100SC	ET610™ 100H
Vacuum	Single 5.7 in, 3-stage	Single 5.7 in, 3-stage	Single 5.7 in, 3-stage
Vac Shutoff	Ball float	Ball float	Ball float
Pump	Diaphragm pump	Diaphragm pump	Diaphragm pump
Waterlift	None	140 in	140 in
Heat	N/A	212° F	Instant 212° F
Heater	N/A	1,100 W	1,750 W
